5.1 Change 10026

Due to the TED 2.0.9 update, additions were made to the invitations to tender (OB01), contract award notices (OB02), cancellations (OB04) and rectifications (OB06). Notices of tender cancellations and rectifications will now also be forwarded to TED.

When registering a contracting authority, the system will now require the main activity of the contracting authority to be entered and will add this to the corresponding notices (ACTIVITY attribute in the AUTH.TYPE element).

The sequence of the sections in Steps 3, 4 and 6 in the invitations to tender was changed and some sections were augmented. New elements here are ADD.OBJECTS and LOT.ADD.OBJECTS and the corresponding sub-elements.
