

## **Information about the introduction of Release 9 on simap.ch**

The following changes have been made to the simap.ch platform. They will be activated on May 5, 2015.

- Forms regarding sustainability in construction tenders: four new forms are available for certain federal agencies. They are used to collect data on sustainability in construction tenders.
- Validation office: Changes were made so that validation staff can inspect and validate the publications submitted by contracting authorities.

You will find a description of the changes in the user guidelines on simap.ch.
